To whom it may concern, I am a loyal XM listener and also a truck driver. I enjoy the variety of the programming on XM, also the Instant Traffic and weather reports. Being a truck driver I depend on these reports to aid in my traveling and navigating in many cities and highways across the US. Respectfully, I insist that the NAB's petition 04-160 be rejected and that the FCC squash yet another attempt at encroaching on our first amendment rights. XM should be allowed to provide this service and we Americans should have the right to receive it.
